**Programs Open To The Public**

**Summer Classes for 2017:**

Math | Engineering | Art | History

Academic Enrichment | Sports Activities | Performing Arts

**CodeSpeak Labs prepare youth to have an impact in the 21st century.**

Computer science is the #1 major at top universities like Stanford and Princeton (where CodeSpeak Labs' founders went to school), and students who can code before college have a clear advantage. Codespeak Labs introduces computer programming for students grades PK - 8. The curriculum includes Google's Blockly, MIT's Scratch, robotics (Lego Mindstorms), HTML/CSS (web development), as well as skill-building in entrepreneurship, communication, and design.
